

§ 10010.27 Cover sheet.

The cover sheet will indicate whether the EIS intended to serve any other environmental review or consultation requirements pursuant to 40 CFR 1502.25.

§ 10010.28 Summary.

The emphasis in the summary should be on those considerations, controversies, and issues which significantly affect the quality of the human environment.

§ 10010.29 Purpose and need.

The purpose and need section may introduce a number of factors, including economic and technical considerations and Commission statutory missions, which may be outside the scope of the EIS. Care should be taken to insure an objective presentation and not a justification.

§ 10010.30 Alternatives including the proposed action.

(a) As a general rule, the following guidance will apply:

(1) For internally initiated proposals; i.e., for those cases where the Commission conducts or controls the planning process, both the draft and final EIS shall identify the Commission's proposed action, or preferred alternative.

(2) For externally initiated proposals; i.e., for those cases where the Commission is reacting to an application or similar request, the draft and final EIS shall identify the applicant's proposed action and the Commission's preferred alternative unless another law prohibits such an expression.

(3) Proposed departures from this guidance must be approved by the Executive Director and the Office of the Solicitor.

(b) Mitigation measures to offset adverse effects of the proposed action or its alternatives are not necessarily independent of these actions and should be incorporated into and analyzed as a part of the proposal and appropriate alternatives. Where appropriate, major mitigation measures may be identified and analyzed as separate alternatives in and of themselves where the environmental consequences are distinct and significant enough to warrant separate evaluation.

§ 10010.31 Appendix.

If an EIS is intended to serve other environmental review or consultation requirements pursuant to 40 CFR 1502.25, any more detailed information needed to comply with these requirements may be included as an appendix.

§ 10010.32 Tiering.

An environmental document prepared by or for the Commission may incorporate by reference, either in part or in its entirety, an earlier environmental impact statement or environmental assessment when the subject matter of the earlier document is directly applicable. The Commission may also choose to prepare, or cause to have prepared, a broad environmental document to cover an entire program or, alternatively, a series of projects within a distinct geographic area, with the intent of later undertaking project-specific documentation and "tiering" to the more general statement or assessment.

§ 10010.33 Incorporation by reference of material into NEPA documents.

Citations of specific topics will include the pertinent page numbers. All literature references will be listed in the bibliography.

§ 10010.34 Incomplete or unavailable information.

The references to overall costs in 40 CFR 1502.22 of the CEQ regulations are not limited to market costs, but may also include other costs such as social costs due to delay.

§ 10010.35 Methodology and scientific accuracy.

Conclusions about environmental effects will be preceded by an analysis that supports that conclusion unless explicit reference by footnote is made to other supporting documentation that is readily available to the public.

§ 10010.36 Environmental review and consultation requirements.

(a) The Commission will maintain a list of applicable environmental review and consultation requirements pursuant to other federal or state laws and regulations and will make this available to interested parties.
